

SOLANA DEFI AGENT SWARM

**SIMPLIFYING DEFI WITH
AI-POWERED
MULTI-AGENT SYSTEMS**

DeFi Challenges Across the Ecosystem

For Users

Complex workflows, fragmented tools, and steep learning curves.

Simplify access for 1M+ Solana DeFi users.

For Developers

Lack of reusable AI frameworks for building efficient systems.

Open Source Multi Agent System Framework

For Businesses

Need for scalable and customizable solutions to streamline operations.

SaaS solutions to automate workflows and optimize operations.

Single Agent Workflow

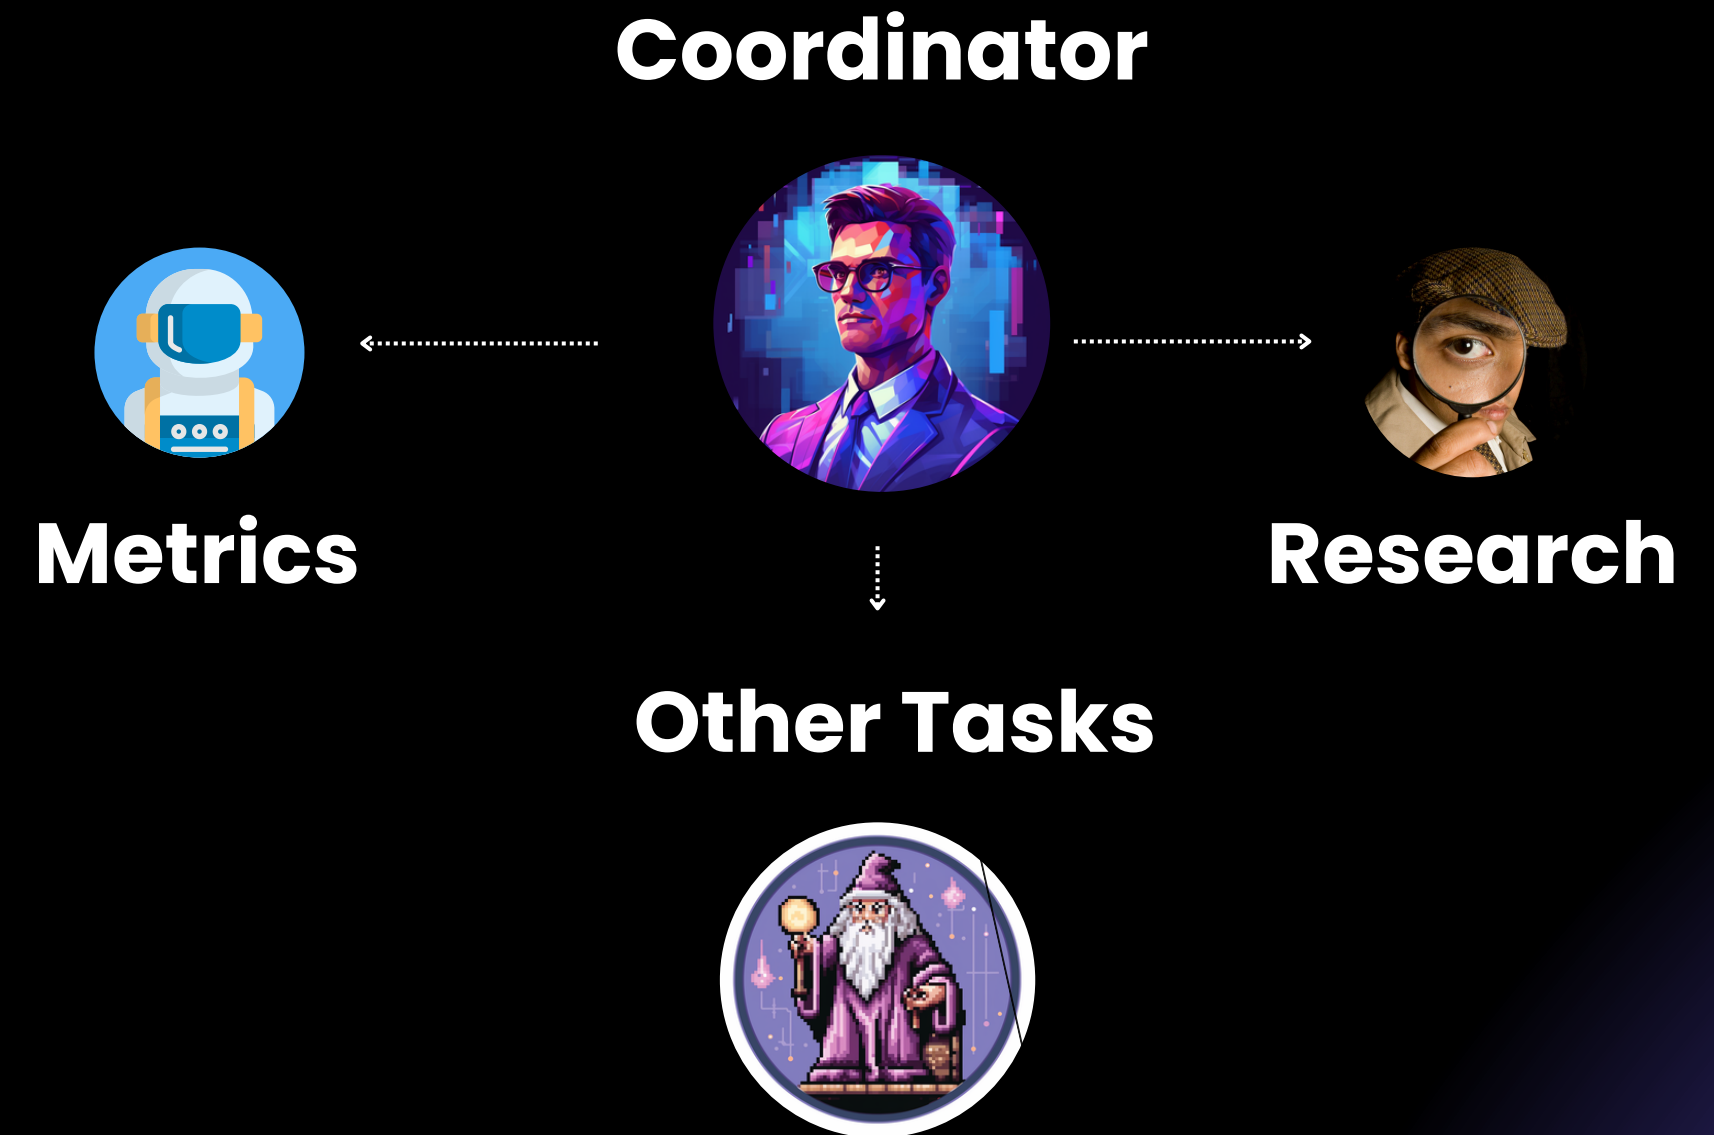

Slow Response

Hallucinations

Poor Quality Response

Multi Agent Workflow

-30% Errors

+40% Accuracy

Benefits of Multi Agents Systems (MAS)

The Heart of Our Innovation

Efficiency Gains

MAS reduces processing time by **60%** compared to single-agent systems in complex workflows, by enabling parallel task execution.

Scalability

MAS systems handle **3x** the workload of single-agent systems by distributing tasks across agents.

Specialization

Each agent focuses on a specific function, improving performance and accuracy by up to **40%**.

Robustness

MAS maintains **95%** system functionality even if individual agents fail.

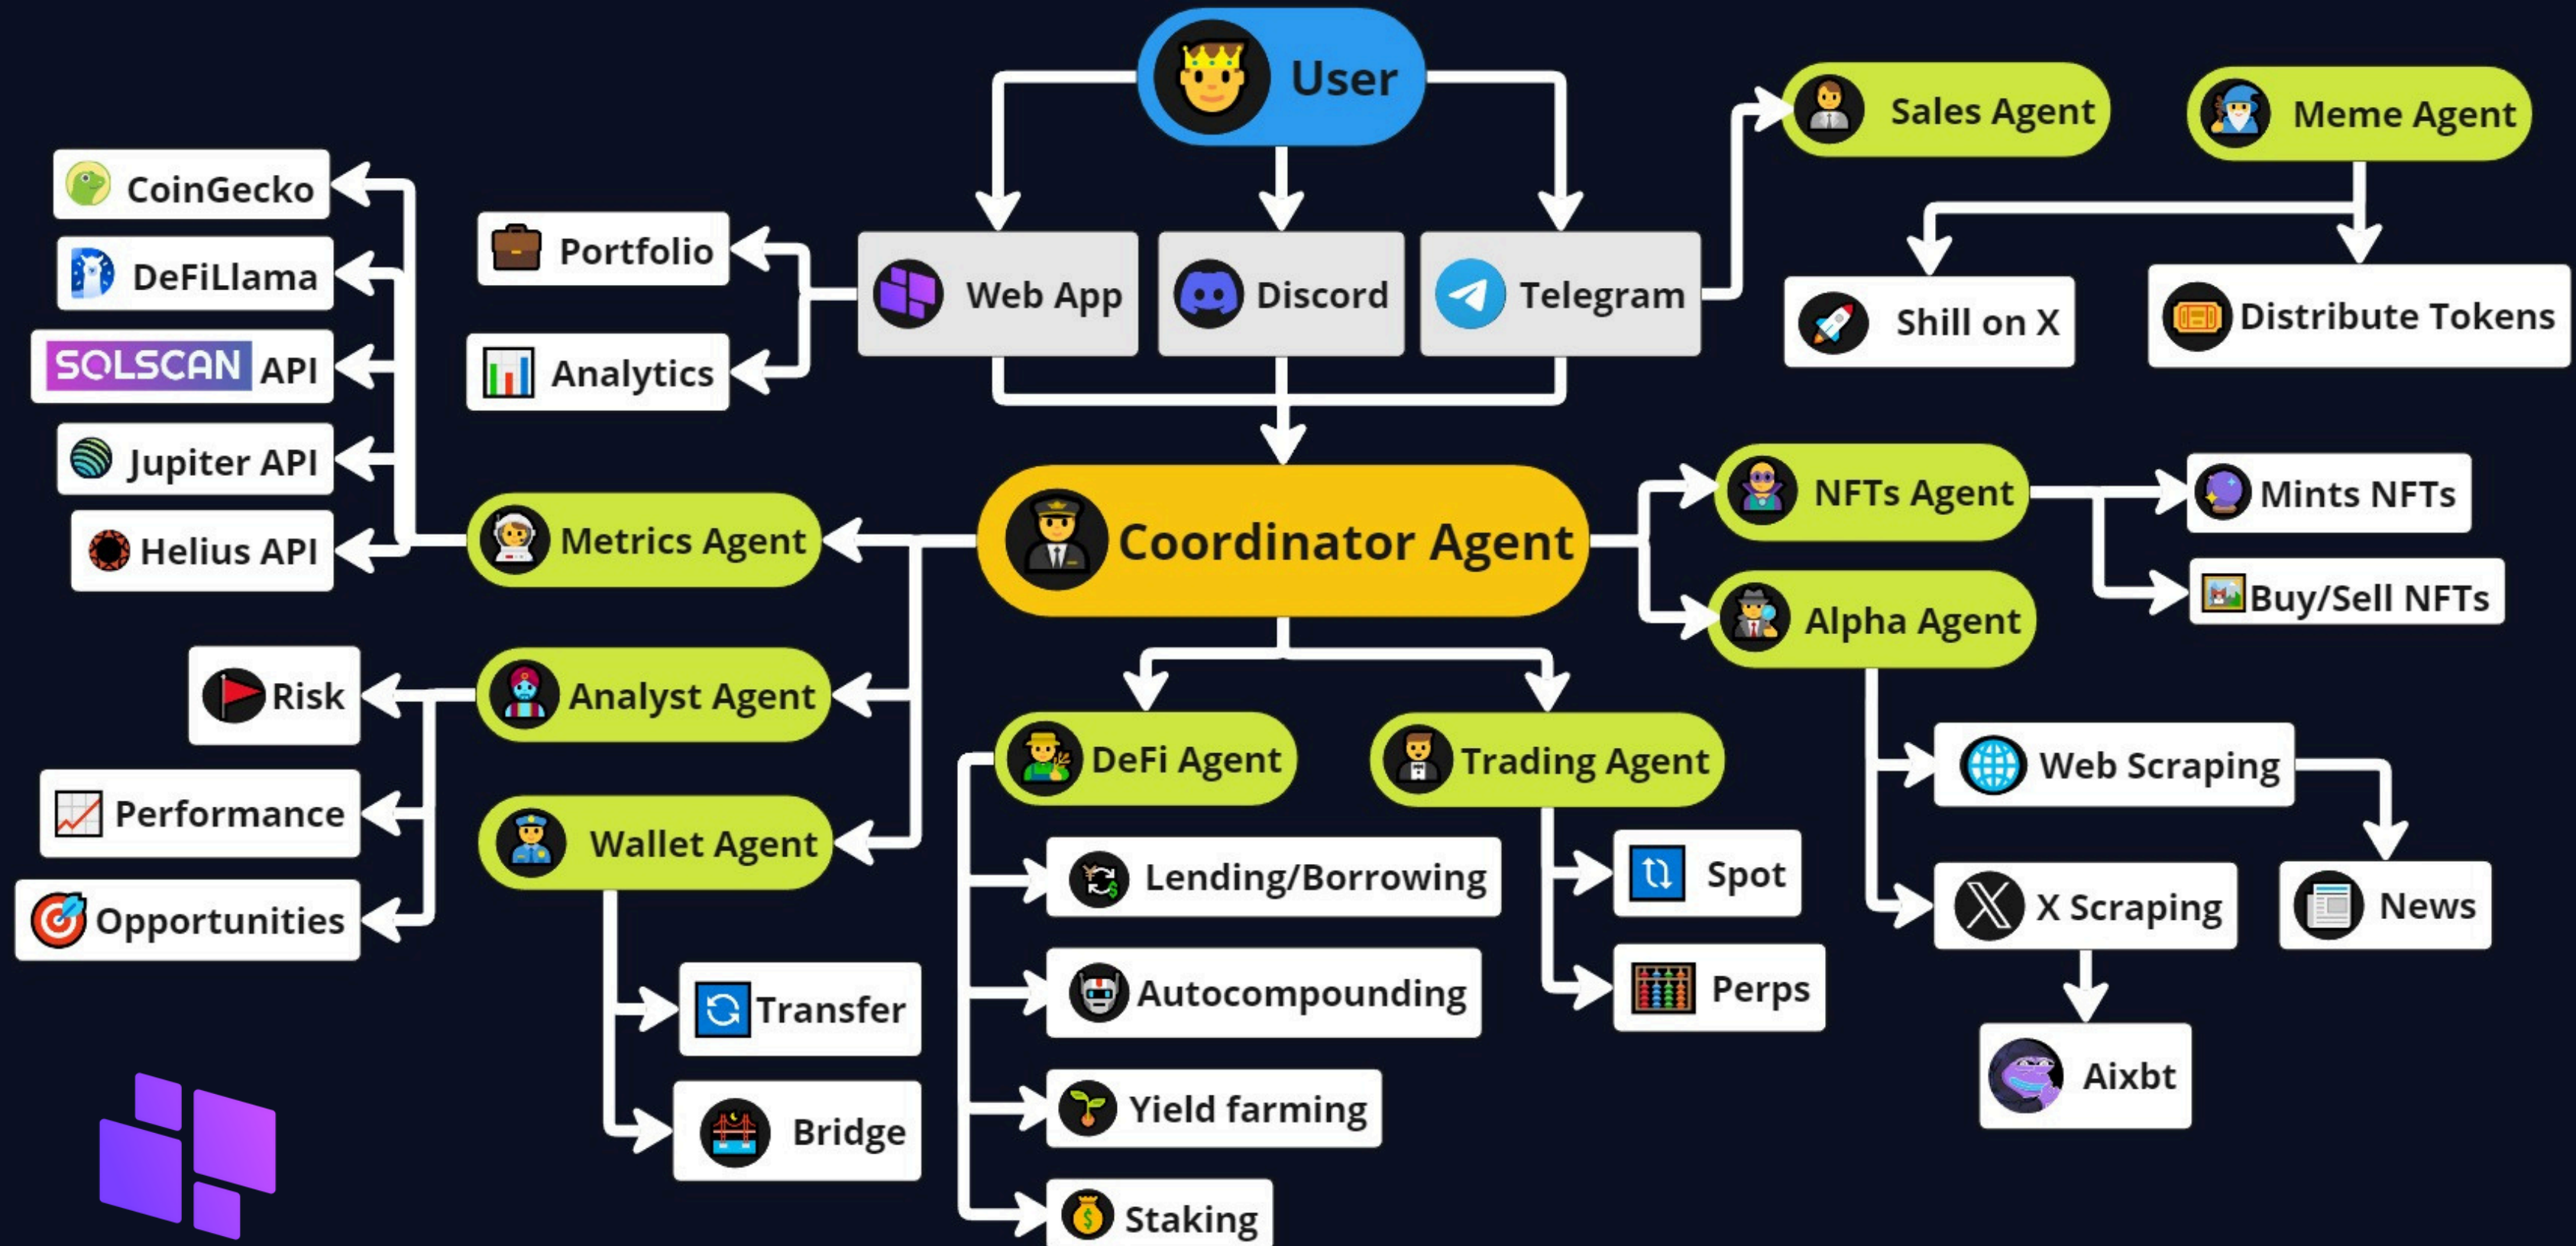

Adaptability

MAS systems integrate with new protocols and APIs **30%** faster than monolithic architectures.

Modularity

Plug-and-play architecture allows easy addition of new agents and capabilities.

Solana DeFi Agent Swarm's Agents

Coordinator Agent

Coordinates tasks and manages team goals and tasks.

Trading Agent

Executes token swaps through Jupiter API.

DeFi Agent

Manages staking, yield farming and lending/borrowing positions.

Metrics Agent

Fetches TVL, prices and APYs providing metrics on demand.

Alpha Agent

Scrapes Twitter and the Web for alpha and news.

NFT Agent

Manages NFTs portfolio and trades.

Sales Agent

Provides information and customer support on Telegram.

Meme Agent

Promotes SoDAS and engages users on Twitter.

Wallet Agent

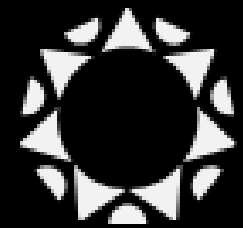

Checks balances and manages transfers

Analyst Agent

Evaluates risks, performance and opportunities.
